## **DETAILED ACTION**

### ***Terminal Disclaimer***

The terminal disclaimer filed on 6/2/2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of any patent granted on the Application Number 09/706,721 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

Claims 7-36 are allowed.

The following is an examiner's statement of reasons for allowance: None of the cited prior art of reference discloses a rayon film and a method for making a film and fiber, possessing a composite crystalline structure of cellulose II and IV, which is prepared by saponifying 75% or greater of the total acetyl groups of a cellulose acetate fiber with a degree of substitution from 2.0. The instant application is distinguished from the parent application because a film is structurally different than a fiber.

Therefore, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to create the instant rayon film and a method for making a film and fiber, possessing a composite crystalline structure of cellulose II and IV, which is prepared by saponifying 75% or greater of the total acetyl groups of a cellulose acetate fiber with a degree of substitution from 2.0 in view of any of the cited prior art of reference.
